*Public Power Creating Valuable
Economic Advantages*

Local ownership of power and power sources, and commitment to quality service, provides our customers valuable economic advantages. We quickly and conveniently work to solve and level of energy request - residential, commercial or industrial.

We reinvest our energy resources in the community. We offer the lowest electric rates in the area and we have committed over \$2 million dollars of annual support to fire, police, EMS, senior citizen, and youth programs. This quality of life advantage makes Duncan one of the most desirable cities in the United States. We are also proud to have helped build our world class community and convention center.
